

A Lift on Wheels

Use the Bruno Chariot® to transport a mobility device behind most vehicles, even a small or mid-sized car. The Chariot's independent suspension carries the load's weight, not your vehicle. Thanks to 360-degree spinning wheels, the Chariot is impossible to jack-knife.

Maneuverable. Go forward, reverse, turn or parallel park -- the Chariot stays precisely in line with your vehicle at all times.

Easy. Drive on/off the self-leveling platform, then press a button to raise/lower the lift. Traction-coated platform can be manually folded up when not in use.

Secure. Self-tensioning retractable belts, with one-handed operation, secure the mobility device in place.

Safe. Integrated safety latch prevents unintentional platform lowering. Light package includes an illuminated license plate holder, brake/running lights and turn signals.

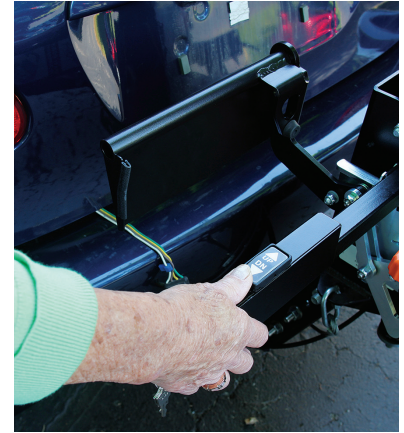

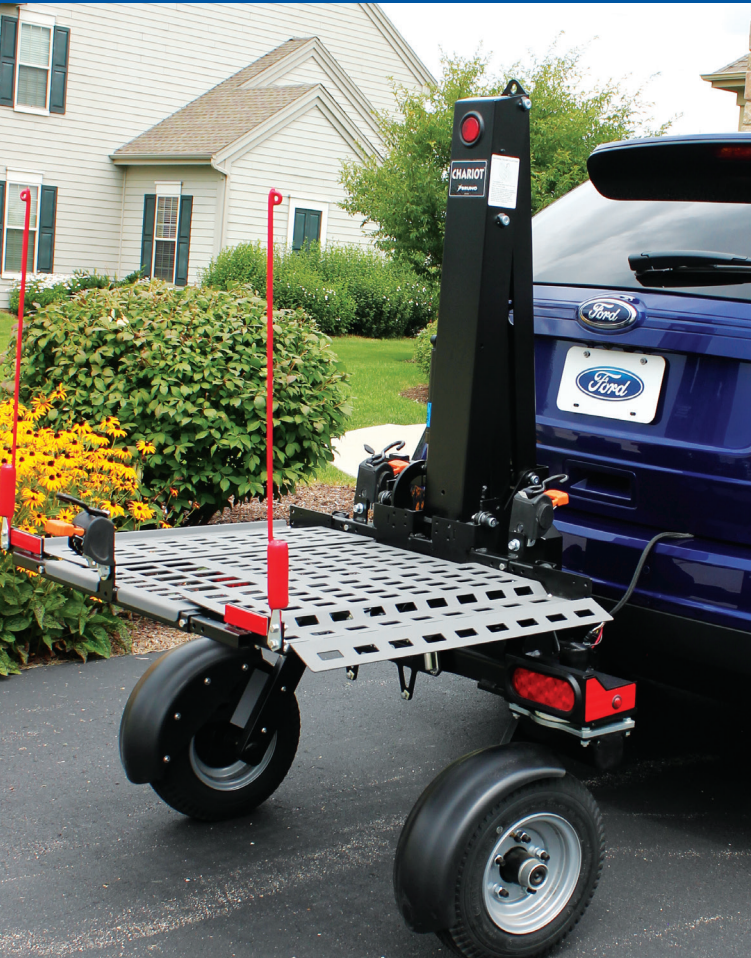

Flexible. Adjustable platform fits most mobility devices. Slightly lower the platform to access most rear cargo areas. Reinstall on another applicable vehicle in the future.

Lifting Capacity
350 lb (159 kg)

Vehicles
Sedans, SUVs, Vans

Warranty
3-Year Limited
